Fig. 4b

A high-contrast, black and white photograph of a mechanical component, likely a piston or valve, showing its internal structure and a central shaft. The image is oriented horizontally. The central part features a large, dark, rectangular block with a complex internal structure, possibly a valve or a piston head. To the right of this block, a long, thin, light-colored shaft extends horizontally. The background is dark and textured, suggesting a metallic surface. The lighting is dramatic, highlighting the edges and internal features of the component.

131

120

A high-contrast, black and white photograph of a mechanical device, possibly a camera or a specialized tool. The device has a textured, metallic surface and a prominent vertical slot or opening on the right side. The image is grainy and has a high level of contrast, emphasizing the mechanical details and textures.
